

Exercises Organized for Practice

少林铁腿绝技 · 分类打印版

Fifty-nine standalone information sheets arranged by training family. Each instructional page retains the original two-row layout and source-figure numbering.

01	Flexibility & Leg Control	Packets 1–10 Chapter 1 · figures 1-1–1-17
	柔功与控腿	

02	Kicks & Aerial Kicks	Packets 11–19 Chapter 1 · figures 1-18–1-55
	踢腿与 腾空腿 法	

03	Strength & Conditioning	Packets 20–28 Chapter 1 · figures 1-56–1-74
	功力训练	

04	Fundamental Footwork	Packets 29–43 Chapter 2 · figures 2-1–2-53
	基本步法	

05	Fundamental Body Methods	Packets 44–59 Chapter 2 · figures 2-54–2-100
	基本身法	

Flexibility & Leg Control

柔功与控腿

Presses, held-leg lifts, splits, and controlled leg extension.

CHAPTER 1 • FIGURES 1-1–1-17 • 10 EXERCISES • 10 INSTRUCTIONAL PAGES

01 Front Leg Press	02 Side Leg Press
03 Rear Leg Press	04 Crouching- Step Leg Press
05 Front Held- Leg Lift	06 Side Held- Leg Lift
07 Rear Held- Leg Lift	08 Front Split
09 Side Split	10 Controlled Leg Hold

Follow each instructional row left to right. The source gives no fixed breath timing.

Front Leg Press

正压腿 · 图 1-1-1-2

1 / 1
FIGURES 1-1-1-2

Follow each row left to right.

Two standalone versions of the same front-leg flexibility drill.

STEP 1

Floor version

ACTION

Bend the right knee and extend the left leg forward. Hook the left toes upward and press both hands gently onto the left knee.

KEY POINT

Keep the pressed leg straight. Increase the range gradually, then change sides.

1-1

**STEP 2**

Supported version

ACTION

Place the left foot on a stable support near hip height. Hook the toes and fold the torso forward over the straight leg.

KEY POINT

Keep both knees extended and the support secure. Use a lower support whenever alignment changes.

1-2

Side Leg Press

侧压腿 · 图 1-3-1-4

1 / 1
FIGURES 1-3-1-4

Follow each row left to right.

Two standalone versions of the lateral leg press.

STEP 1

Floor version

ACTION

Sink over the right leg and extend the left leg to the side with the toes hooked. Reach the left arm overhead and incline toward the straight leg.

KEY POINT

Keep the straight leg long and the chest open. Press down without collapsing the supporting knee inward.

1-3

STEP 2

Supported version

ACTION

Place the left leg sideways on a secure support. Reach the left arm overhead and incline the torso toward the raised leg.

KEY POINT

Keep the support foot and standing foot stable. Progress by height only after the torso stays aligned.

1-4

Rear Leg Press

后压腿 · 图 1-5-1-6

1 / 1

FIGURES 1-5-1-6

Follow each row left to right.

Two standalone versions of the rear-leg and front-hip stretch.

STEP 1

Floor version

ACTION

Sink over the left leg and extend the right leg behind with the instep down. Let the upper body press gently back.

KEY POINT

Open the chest and hips while keeping the shoulders level. Avoid forcing the lower back.

STEP 2

Supported version

ACTION

Place the right leg behind on a secure support near hip height. Keep the hands at the waist and extend gently backward.

KEY POINT

Keep both legs straight and the pelvis controlled. Use a lower support if the back arches sharply.

Crouching-Step Leg Press

仆步压腿 · 图 1-7

1 / 1
FIGURES 1-7-1-7

Follow each row left to right.

One posture, divided into setup and working position.

STEP 1

Set the stance

ACTION

Squat fully over the right leg.
Extend the left leg sideways with
the toes turned slightly inward.

KEY POINT

Keep the extended knee straight and
the whole foot controlled. Use the
hands for balance as needed.

1-7

STEP 2

Press and alternate

ACTION

Hold the feet or ankles and settle
the hips downward into the
crouching-step shape.

KEY POINT

Work gradually and change sides.
Keep the heel of the squatting leg
grounded when possible.

1-7

Front Held-Leg Lift

正扳腿 · 图 1-8-1-10

1 / 1

FIGURES 1-8-1-10

Follow each row left to right.

The wall-supported pose is an alternative, not a continuation.

STEP 1

Lift and secure

ACTION

Stand on the right leg, lift the bent left knee, and secure the left foot and knee with the hands.

KEY POINT

Stand tall before increasing the lift. Keep the supporting knee steady and the gaze level.

1-8

STEP 2

Straighten or support

ACTION

Straighten the left leg forward and upward. The source also shows a wall-supported high hold.

KEY POINT

Do not pull the knee past a controlled range. Use a stable support and train both sides evenly.

1-9

1-10

Side Held-Leg Lift

侧扳腿 · 图 1-11-1-12

1 / 1

FIGURES 1-11-1-12

Follow each row left to right.

Two standalone versions of the lateral held-leg position.

STEP 1

Free-standing version

ACTION

Stand on the right leg, lift the left leg sideways, and support the ankle from the inside as the knee straightens.

KEY POINT

Keep the torso upright and the standing foot rooted. Raise only as high as alignment permits.

1-11

STEP 2

Wall-supported version

ACTION

Use a stable wall or post while holding the raised leg to the side.

KEY POINT

Use the support to refine posture, not to force height. Keep both knees straight and alternate sides.

1-12

Rear Held-Leg Lift

后扳腿 · 图 1-13-1-14

1 / 1

FIGURES 1-13-1-14

Follow each row left to right.

Both source versions require a partner and secure support.

STEP 1

Partner lift

ACTION

Hold a stable support while a partner raises the straight right leg behind and upward.

KEY POINT

The partner should lift slowly and stop immediately if the standing leg, hip, or back loses alignment.

1-13

STEP 2

Shoulder-supported version

ACTION

The source also shows a partner supporting the lifted leg across the shoulder while the standing practitioner holds a rail.

KEY POINT

Coordinate before moving. Keep the raised knee straight and avoid twisting the pelvis.

1-14

Front Split

竖叉 · 图 1-15

1 / 1

FIGURES 1-15-1-15

Follow each row left to right.

One posture, divided into entry and alignment checks.

STEP 1

Enter with support

ACTION

Slide the legs forward and back while keeping both knees straight. Use the hands on the floor to control the descent.

KEY POINT

Stop above the floor whenever the pelvis twists or either knee bends.

1-15

STEP 2

Settle and align

ACTION

Lengthen the legs into one front-to-back line. Keep the rear instep and the front foot aligned as shown.

KEY POINT

Lower gradually; never bounce. Practice both lead-leg versions.

1-15

Side Split

横叉 · 图 1-16

1 / 1

FIGURES 1-16-1-16

Follow each row left to right.

One posture, divided into entry and alignment checks.

STEP 1

Enter with support

ACTION

Slide both legs sideways while keeping the knees straight. Use the hands to regulate the descent.

KEY POINT

Keep the inner edges of the feet controlled and stop before the knees roll forward.

1-16

STEP 2

Settle and align

ACTION

Extend the legs into one side-to-side line with the toes facing upward.

KEY POINT

Lower gradually without bouncing. Keep the torso lifted and the hips centered.

1-16

Controlled Leg Hold

控腿 · 图 1-17

1 / 1

FIGURES 1-17-1-17

Follow each row left to right.

A balance-and-control drill rather than a swinging kick.

STEP 1

Lift the knee

ACTION

Stand on the right leg and raise the bent left knee toward the left side.

KEY POINT

Set the standing leg and torso before straightening. Use a support while learning the balance.

1-17

**STEP 2**

Extend and hold

ACTION

Straighten the left leg high to the side and hold it under muscular control.

KEY POINT

Keep the foot level and the supporting leg upright. Lower smoothly and train both sides.

1-17

Kicks & Aerial Kicks

踢腿与腾空腿法

Straight, crescent, thrust, jumping, and turning kick sequences.

CHAPTER 1 • FIGURES 1-18–1-55 • 9 EXERCISES • 17 INSTRUCTIONAL PAGES

11 Front Kick	12 Side Kick
13 Outward Crescent Kick	14 Inward Crescent Kick
15 Snap Kick	16 Side Thrust Kick
17 Flying Kick	18 Tornado Kick
19 Aerial Outward Lotus Kick	

Follow each instructional row left to right. The source gives no fixed breath timing.

Front Kick

正踢腿 · 图 1-18-1-21

1 / 2

FIGURES 1-18-1-21

Follow each row left to right.

Follow the linked movement left to right; boundary poses repeat.

STEP 1

Set and step

ACTION

Begin upright with the arms extended sideways. Step the left foot a half-step forward and let the right heel release.

KEY POINT

Keep the waist upright, chest open, and gaze forward.

STEP 2

Drive upward

ACTION

Keep the right leg straight, hook the toes, and kick upward toward the front of the body.

KEY POINT

Begin slowly and use a lower height until the knee stays straight.

Front Kick

正踢腿 · 图 1-18-1-21

2 / 2

FIGURES 1-18-1-21

STEP 3

Lower with control

ACTION

Reverse the path and lower the right leg with controlled tension until the foot touches lightly.

KEY POINT

Do not drop the leg or lean backward to chase height.

STEP 4

Reset and alternate

ACTION

Return to the starting stance and repeat with the other leg.

KEY POINT

Pressing and split work should precede high repetitions. Alternate sides evenly.

Side Kick

侧踢腿 · 图 1-22-1-25

1 / 2

FIGURES 1-22-1-25

Follow each row left to right.

Follow the linked movement left to right; boundary poses repeat.

STEP 1

Set and cover-step

ACTION

Begin upright with the arms extended. Step the right foot across and forward to prepare the turn.

KEY POINT

Stay tall and place the stepping foot securely before kicking.

STEP 2

Turn and kick

ACTION

Turn right and kick the straight left leg upward to the left side with the toes hooked.

KEY POINT

Keep the standing leg stable and the torso from collapsing toward the kick.

Side Kick

侧踢腿 · 图 1-22-1-25

STEP 3

Lower with control

ACTION

Reverse the path and lower the left leg until the foot lands lightly and flat.

KEY POINT

Maintain the same upright alignment during the descent.

STEP 4

Reset and alternate

ACTION

Return to the starting stance and repeat to the other side.

KEY POINT

Build speed only after the turn and landing stay controlled.

Outward Crescent Kick

外摆腿 · 图 1-26-1-29

1 / 2

FIGURES 1-26-1-29

Follow each row left to right.

Follow the linked movement left to right; boundary poses repeat.

STEP 1

Set and step

ACTION

Begin upright with the arms extended. Step the left foot forward and prepare the right leg.

KEY POINT

Keep the waist tall and the support foot stable.

STEP 2

Lift across center

ACTION

With the right knee straight and toes hooked, lift the leg upward toward the left side of the body.

KEY POINT

The arc begins across the centerline; do not twist the standing knee.

Outward Crescent Kick

外摆腿 · 图 1-26-1-29

2 / 2

FIGURES 1-26-1-29

STEP 3

Sweep outward

ACTION

Continue the straight-leg arc outward to the right, then begin the controlled descent.

KEY POINT

Open the hip smoothly without throwing the torso backward.

STEP 4

Reset and alternate

ACTION

Lower the right foot and return to the starting stance before changing legs.

KEY POINT

Train the complete arc slowly before adding speed.

Inward Crescent Kick

里合腿 · 图 1-30-1-33

1 / 2

FIGURES 1-30-1-33

Follow each row left to right.

Follow the linked movement left to right; boundary poses repeat.

STEP 1

Set and step

ACTION

Begin upright with the arms extended. Step the left foot forward and prepare the right leg.

KEY POINT

Keep the support side tall and stable.

STEP 2

Lift outward

ACTION

Raise the straight right leg toward the right side with the toes hooked.

KEY POINT

Let the hip create the arc while the torso remains controlled.

Inward Crescent Kick

里合腿 · 图 1-30-1-33

2 / 2

FIGURES 1-30-1-33

STEP 3

Sweep inward

ACTION

Carry the leg inward across the front of the body, then lower it under control.

KEY POINT

Keep the knee straight and avoid wrenching the standing foot.

STEP 4

Reset and alternate

ACTION

Return to the starting stance and repeat with the other leg.

KEY POINT

Practice the full path slowly before increasing speed.

Snap Kick

弹腿 · 图 1-34-1-36

1 / 1

FIGURES 1-34-1-36

Follow each row left to right.

Follow the linked movement left to right; the middle pose repeats.

STEP 1

Step and chamber

ACTION

Begin with the fists at the waist. Step the left foot forward and lift the right knee to about waist height.

KEY POINT

Keep the thigh level and the standing leg firm.

STEP 2

Snap forward

ACTION

Extend the right knee quickly and send the foot forward, then retract with control.

KEY POINT

Power comes from fast knee extension, not from leaning the torso backward.

Side Thrust Kick

侧踹腿 · 图 1-37-1-39

1 / 1

FIGURES 1-37-1-39

Follow each row left to right.

Follow the linked movement left to right; the middle pose repeats.

STEP 1

Cover-step and turn

ACTION

Begin with the fists at the waist. Cross the right foot toward the left and turn the head and torso left.

KEY POINT

Set the supporting foot and keep the knees softly controlled.

STEP 2

Drive the heel

ACTION

Lift the left leg, turn the toes inward, and thrust the heel and sole upward toward the left side.

KEY POINT

Keep the kicking path direct. Lean only enough to balance, then retract under control.

Flying Kick

腾空飞脚 · 图 1-40-1-44

1 / 2

FIGURES 1-40-1-44

Follow each row left to right.

A linked jumping sequence. Learn the path at ground level first.

STEP 1

Step and load

ACTION

Step forward on the right foot, soften the knee, incline the upper body slightly back, and swing both arms behind.

KEY POINT

Use a clear, stable takeoff stance before adding height.

STEP 2

Jump and swing

ACTION

Push from the right foot, swing the left knee upward, and carry both arms overhead as the body rises.

KEY POINT

Coordinate the arm swing and knee lift; do not force the jump.

Flying Kick

腾空飞脚 · 图 1-40-1-44

2 / 2

FIGURES 1-40-1-44

STEP 3

Kick in the air

ACTION

Extend the right leg forward and upward while the left knee stays lifted. Meet the right foot with the right hand.

KEY POINT

Use a comfortable kick height and keep the landing in view.

STEP 4

Land in sequence

ACTION

Lower the legs and land left then right, absorbing the impact through bent knees.

KEY POINT

Practice on a clear, non-slip surface and stop if the landing becomes heavy.

Tornado Kick

旋风脚 · 图 1-45-1-50

1 / 3

FIGURES 1-45-1-50

Follow each row left to right.

A linked turning jump. Learn the turn, jump, and landing separately first.

STEP 1

Step into the turn

ACTION

Step the left foot forward and turn the body right as the arms open into the illustrated preparation.

KEY POINT

Keep the head level and the floor clear before rotating.

STEP 2

Plant and coil

ACTION

Continue turning left-front, step the right foot, bend the knee, and coil the arms for takeoff.

KEY POINT

Place the right foot securely; avoid twisting on a fixed knee.

Tornado Kick

旋风脚 · 图 1-45-1-50

2 / 3

FIGURES 1-45-1-50

STEP 3

Jump and rotate

ACTION

Push from the right foot, swing the left knee back and upward, and rotate the torso left as the arms circle.

KEY POINT

Build the rotation from the step and arm path rather than forcing the neck.

STEP 4

Sweep and strike

ACTION

In the air, sweep the right leg inward and upward while the left palm meets the sole.

KEY POINT

Use a lower target until the body can remain organized in the air.

Tornado Kick

旋风脚 · 图 1-45-1-50

3 / 3

FIGURES 1-45-1-50

STEP 5

Land under control

ACTION

Complete the turn and land on the forefeet in sequence or together, as the source permits.

KEY POINT

Absorb the landing through bent knees and regain balance before moving on.

STEP 6

Reset before repeating

ACTION

Return to the upright starting stance and set the feet before another repetition.

KEY POINT

Do not chain repetitions after a loose or noisy landing.

Aerial Outward Lotus Kick

腾空外摆莲 · 图 1-51-1-55

1 / 2

FIGURES 1-51-1-55

Follow each row left to right.

A linked turning jump. Learn the stepping arc and landing before adding the aerial strike.

STEP 1

Arc-step and load

ACTION

From the upright stance, arc-step the right foot forward with the toe turned outward. Turn right and swing both arms behind.

KEY POINT

Keep the stepping heel grounded and the route clear.

STEP 2

Jump and turn

ACTION

Push from the right foot, sweep the left leg upward to the right, and clap the palms overhead while continuing the right turn.

KEY POINT

Use the arms and lead leg to organize the rotation.

Aerial Outward Lotus Kick

腾空外摆莲 · 图 1-51-1-55

2 / 2

FIGURES 1-51-1-55

STEP 3

Sweep and strike

ACTION

In the air, bend the left knee and sweep the right leg upward and outward. Strike the right sole with the hands in sequence.

KEY POINT

Keep the upper body slightly forward and use a comfortable target height.

STEP 4

Land and absorb

ACTION

Lower the feet in sequence or together and settle into a stable upright landing.

KEY POINT

Let the forefeet touch first, bend the knees to absorb impact, and regain balance.

Strength & Conditioning

功力训练

Loaded leg strength, locomotion, progressive contact, and bag work.

Follow each instructional row left to right. The source gives no fixed breath timing.

Squat Holding a Stone Lock

提石锁下蹲 · 图 1-56

1 / 1

FIGURES 1-56–1-56

Follow each row left to right.

A loaded squat shown in one source figure; setup and repetition are separated for clarity.

STEP 1

Secure the load

ACTION

Stand upright with the stone lock centered between the legs and held firmly in both hands.

KEY POINT

Use a manageable load, clear floor space, and an even stance.

STEP 2

Squat and rise

ACTION

Bend the knees and hips to lower under control, then stand without swinging the weight.

KEY POINT

Keep the trunk braced and the knees tracking with the feet.

Hooked Stone-Lock Leg Extensions

脚勾石锁腿屈伸 · 图 1-57

1 / 1

FIGURES 1-57-1-57

Follow each row left to right.

A seated loaded knee-extension drill shown in one source figure.

STEP 1

Set the position

ACTION

Sit securely on the raised support and hook one foot through the handle of the stone lock.

KEY POINT

Stabilize the seat and begin with the knee bent and the load clear of the floor.

STEP 2

Extend and return

ACTION

Straighten the loaded leg forward, then bend the knee slowly to return.

KEY POINT

Use a light load first; do not swing or snap the knee.

Weighted Side Horse-Step Squat

负重侧马步蹲立 · 图 1-58-1-59

1 / 1

FIGURES 1-58-1-59

Follow each row left to right.

A linked lateral squat performed with a balanced shoulder load.

STEP 1

Set the shoulder load

ACTION

Stand in a wide stance with the bar balanced across the shoulders and both hands controlling it.

KEY POINT

Center the load before moving and keep the spine upright.

STEP 2

Sink to one side

ACTION

Shift over one leg and bend it deeply while the other leg lengthens to the side; rise and change sides.

KEY POINT

Keep both feet planted and use only a range that preserves knee alignment.

Weighted Squat

负重蹲起 · 图 1-60

1 / 1

FIGURES 1-60-1-60

Follow each row left to right.

A shoulder-loaded squat shown in one source figure.

STEP 1

Set the stance

ACTION

Balance the bar across the shoulders, take an even stance, and brace before descending.

KEY POINT

Use collars, a clear area, and a load that can be controlled without assistance.

STEP 2

Lower and stand

ACTION

Bend the hips and knees into the squat, then drive evenly through both feet to stand.

KEY POINT

Keep the load centered and avoid letting either knee collapse inward.

Weighted Heel Raise

负重提踵 · 图 1-61

1 / 1

FIGURES 1-61-1-61

Follow each row left to right.

A shoulder-loaded calf raise shown in one source figure.

STEP 1

Stand tall

ACTION

Set the shoulder load and stand with the feet parallel and the body vertical.

KEY POINT

Use a stable handhold or spotter if balance is uncertain.

STEP 2

Raise the heels

ACTION

Press through the forefeet to lift both heels, pause briefly, and lower with control.

KEY POINT

Keep the ankles aligned and avoid bouncing at the bottom.

Sandbag Leg Training

沙绑腿训练法 · 图 1-62-1-65

1 / 2

FIGURES 1-62-1-65

Follow each row left to right.

Four separate weighted locomotion and jumping drills; they are not one continuous sequence.

STEP 1

Secure the leg weights

ACTION

Fasten the sand weights evenly around the lower legs before walking or running on level ground.

KEY POINT

Check circulation and fastening; begin with short, controlled intervals.

1-62

STEP 2

Jump onto steps

ACTION

Use a compact two-foot jump to move onto a low, stable step.

KEY POINT

Start low, land softly, and stop if the weights shift.

1-63

Sandbag Leg Training

沙绑腿训练法 · 图 1-62-1-65

2 / 2

FIGURES 1-62-1-65

1-64

STEP 3

Hop up stairs

ACTION

Progress upward over regular steps while keeping the knees flexed and the landings quiet.

KEY POINT

Use a rail or spotter and never train on loose or uneven stairs.

1-65

STEP 4

Climb with control

ACTION

Step upward under the added leg load while maintaining an upright trunk.

KEY POINT

Favor steady placement over speed and train both lead legs evenly.

Leg Conditioning Strikes

排打 · 图 1-66-1-67

1 / 1

FIGURES 1-66-1-67

Follow each row left to right.

Two sides of a progressive self-tapping drill, not a movement chain.

STEP 1

Condition one side

ACTION

Use the training implement to tap along the fleshy surfaces of one leg as illustrated.

KEY POINT

Avoid joints, the shin edge, and injured tissue; begin very lightly.

1-66

1-67

STEP 2

Change sides

ACTION

Repeat the controlled tapping pattern on the opposite leg.

KEY POINT

Match the intensity on both sides and stop for sharp pain, numbness, or swelling.

Post Kicking

踢桩 · 图 1-68-1-71

1 / 2

FIGURES 1-68-1-71

Follow each row left to right.

Four separate post-contact variations; condition progressively rather than chaining them.

STEP 1

Front contact

ACTION

Place a controlled front kick against the post at a comfortable height.

KEY POINT

Begin with touch contact and a padded target; never strike an immovable post at full force.

1-68

STEP 2

Side contact

ACTION

Turn the hip and place the side of the foot or heel against the post.

KEY POINT

Align the ankle before adding pressure.

1-69

Post Kicking

踢桩 · 图 1-68-1-71

2 / 2

FIGURES 1-68-1-71

STEP 3

Angled contact

ACTION

Use the illustrated outward angle to place the lower leg or foot against the post.

KEY POINT

Keep the standing knee free to turn and avoid twisting it.

STEP 4

Low straight contact

ACTION

Extend the leg into the lower post and withdraw along the same path.

KEY POINT

Use controlled range and alternate legs; power is not the first progression.

Sandbag Kicking

踢沙袋 · 图 1-72-1-74

1 / 2

FIGURES 1-72-1-74

Follow each row left to right.

Three independent bag-contact variations; each should be practiced separately.

1-72

STEP 1

Side kick contact

ACTION

Place a controlled side kick into the hanging bag and retract without losing posture.

KEY POINT

Let the bag hang freely and keep the support foot able to pivot.

1-73

STEP 2

Front kick contact

ACTION

Drive the foot forward into the center of the bag, then return to balance.

KEY POINT

Keep the toes and ankle organized for the chosen contact surface.

Sandbag Kicking

踢沙袋 · 图 1-72-1-74

2 / 2

FIGURES 1-72-1-74

STEP 3

Low-line contact

ACTION

Use the illustrated lower-line kick against the bag from a stable stance.

KEY POINT

Do not chase a swinging bag with a locked knee.

STEP 4

Reset between kicks

ACTION

Allow the bag to settle enough to re-establish distance before the next repetition.

KEY POINT

Increase force only after placement, retraction, and balance are consistent.

Fundamental Footwork

基本步法

Advancing, retreating, crossing, jumping, kneeling, and turning steps.

Advance Step

上步 · 图 2-1-2-3

1 / 1

FIGURES 2-1-2-3

Follow each row left to right.

Follow the linked stepping sequence left to right.

STEP 1

Move the lead foot

ACTION

From the guarded stance, step the lead foot forward along the intended line.

KEY POINT

Keep the head level and do not let the stance narrow excessively.

STEP 2

Recover the stance

ACTION

Bring the rear foot forward enough to restore the original stance width.

KEY POINT

Move the feet in sequence without crossing them.

Entering Step

进步 · 图 2-4-2-5

1 / 1

FIGURES 2-2-2-5

Follow each row left to right.

A short entering action followed by a controlled reset.

STEP 1

Enter

ACTION

Drive the body forward from the stance as the stepping foot closes distance.

KEY POINT

Keep the guard present and place the foot before transferring full weight.

STEP 2

Re-form the stance

ACTION

Set the following foot so the body returns to a balanced fighting stance.

KEY POINT

Finish able to move again in any direction.

Following Step

跟步 · 图 2-6-2-8

1 / 1

FIGURES 2-6-2-8

Follow each row left to right.

Follow the linked movement; the middle posture repeats across rows.

STEP 1

Initiate

ACTION

Shift forward and let the lead foot begin the step without rising in the stance.

KEY POINT

Keep the feet close to the floor.

STEP 2

Follow

ACTION

Bring the rear foot after the lead foot to recover the working distance between them.

KEY POINT

Do not let the following foot collide with or pass the lead foot.

Follow-and-Advance Step

跟进步 · 图 2-9-2-11

1 / 1

FIGURES 2-9-2-11

Follow each row left to right.

A linked two-part advance; the middle posture repeats.

STEP 1

Follow in

ACTION

Draw the rear foot inward to load the forward movement.

KEY POINT

Keep the torso quiet and the guard stable.

STEP 2

Advance out

ACTION

Send the lead foot forward and settle into the renewed stance.

KEY POINT

Land softly and preserve enough width for balance.

Retreat Step

退步 · 图 2-12-2-14

1 / 1

FIGURES 2-12-2-14

Follow each row left to right.

Follow the linked retreat; the middle posture repeats.

STEP 1

Move the rear foot

ACTION

Step the rear foot backward while maintaining the guarded upper-body position.

KEY POINT

Keep the front knee aligned and the head level.

STEP 2

Recover the stance

ACTION

Draw the lead foot back enough to restore the original stance width.

KEY POINT

Do not cross the feet or let the weight fall onto the heels.

Inserting Step

插步 · 图 2-15-2-16

1 / 1

FIGURES 2-15-2-16

Follow each row left to right.

A crossing insertion shown in two linked figures.

STEP 1

Insert the foot

ACTION

Thread the stepping foot behind or across the standing leg as illustrated.

KEY POINT

Place the ball of the foot lightly and keep the knees free to turn.

STEP 2

Stabilize before exit

ACTION

Control the crossed position, then unwind to a balanced stance before repeating.

KEY POINT

Avoid loading a twisted knee or remaining crossed longer than needed.

Straddling Cross Step

跨步 · 图 2-17-2-20

1 / 1

FIGURES 2-17-2-20

Follow each row left to right.

Follow the linked lateral crossing sequence left to right.

STEP 1

Cross the line

ACTION

Step across the body line while turning the hips toward the new direction.

KEY POINT

Keep the stepping foot low and place it before shifting fully.

STEP 2

Open to stance

ACTION

Continue the turn and open the feet into a stable guarded stance.

KEY POINT

Let the feet pivot with the body so the knees do not bind.

Withdrawal Step

撤步 · 图 2-21-2-24

1 / 1

FIGURES 2-21-2-24

Follow each row left to right.

Follow the linked withdrawal sequence left to right.

STEP 1

Release the front

ACTION

Lighten and withdraw the lead side while keeping the guard directed forward.

KEY POINT

Avoid lifting the body as the foot moves.

STEP 2

Turn and settle

ACTION

Complete the withdrawing turn and place the feet into the new stance.

KEY POINT

Finish balanced rather than leaning away from the movement.

Beating Step

击步 · 图 2-25-2-30

1 / 2

FIGURES 2-25-2-30

Follow each row left to right.

A linked quick foot-change sequence; learn it slowly before adding speed.

STEP 1

Load the change

ACTION

Shift the weight and prepare the feet for the quick exchange.

KEY POINT

Stay compact and keep the upper body guarded.

STEP 2

Beat the feet

ACTION

Use the illustrated foot action to displace one foot as the other takes its place.

KEY POINT

Keep the contact light and close to the floor.

Beating Step

击步 · 图 2-25-2-30

2 / 2

FIGURES 2-25-2-30

STEP 3

Redirect

ACTION

Carry the new lead foot toward the intended direction.

KEY POINT

Do not let momentum pull the torso past the base.

STEP 4

Set the stance

ACTION

Place the feet and finish in a stable guard.

KEY POINT

Pause until balance is clear before repeating.

Switch Jump Step

换跳步 · 图 2-31-2-34

1 / 1

FIGURES 2-31-2-34

Follow each row left to right.

A linked jumping switch; practice the landing before adding height.

STEP 1

Load and lift

ACTION

Bend the knees and spring upward as the feet begin to exchange positions.

KEY POINT

Use only enough height to clear the floor.

STEP 2

Switch and land

ACTION

Complete the foot switch in the air and land in the opposite stance.

KEY POINT

Land softly on both forefeet with the knees bent.

Vertical Jump Step

纵跳步 · 图 2-35-2-37

1 / 1

FIGURES 2-35-2-37

Follow each row left to right.

A linked vertical jump from and back to the guarded stance.

STEP 1

Load and jump

ACTION

Bend the knees and drive vertically while maintaining the guarded torso.

KEY POINT

Jump straight up rather than drifting.

STEP 2

Return to stance

ACTION

Descend and recover the stance under the body.

KEY POINT

Land quietly and absorb the impact before moving again.

Kneeling Step

跪步 · 图 2-38-2-44

1 / 2

FIGURES 2-38-2-44

Follow each row left to right.

A linked level-changing sequence; use padding while learning.

STEP 1

Lower the level

ACTION

Shift to one side and bend deeply as the rear knee approaches the floor.

KEY POINT

Keep control through the standing foot.

STEP 2

Place the knee

ACTION

Set the kneeling position without dropping body weight onto the knee.

KEY POINT

Use a mat and keep the toes positioned to support the exit.

Kneeling Step

跪步 · 图 2-38-2-44

2 / 2

FIGURES 2-38-2-44

STEP 3

Turn through

ACTION

Continue the illustrated turn from the low base.

KEY POINT

Move the hips and feet together rather than twisting a planted knee.

STEP 4

Rise to guard

ACTION

Drive through the feet to leave the kneel and regain the standing stance.

KEY POINT

Stand under control and re-establish balance before repeating.

Hooking Pivot Step

扣步 · 图 2-45-2-47

1 / 1

FIGURES 2-45-2-47

Follow each row left to right.

A linked inward foot placement and pivot.

STEP 1

Hook the step

ACTION

Place the stepping foot inward across the line to begin the pivot.

KEY POINT

Keep the heel light enough for the turn.

STEP 2

Complete the pivot

ACTION

Turn the body around the placed foot and recover the guarded stance.

KEY POINT

Let both feet adjust so the knees finish aligned.

Cross-Follow Step

跨跟步 · 图 2-48-2-50

1 / 1

FIGURES 2-48-2-50

Follow each row left to right.

A linked crossing step followed by stance recovery.

STEP 1

Cross forward

ACTION

Carry one foot across and forward while turning toward the new line.

KEY POINT

Place the foot securely before the body follows.

STEP 2

Follow and settle

ACTION

Bring the trailing foot through to rebuild the stance.

KEY POINT

Finish with usable width and the guard facing the direction of travel.

Leaping Step

跃步 · 图 2-51-2-53

1 / 1

FIGURES 2-51-2-53

Follow each row left to right.

A linked forward leap; boundary posture repeats.

STEP 1

Load and take off

ACTION

Push from the supporting leg and lift the opposite knee to carry the body forward.

KEY POINT

Use a small distance first and keep the landing area clear.

STEP 2

Travel and land

ACTION

Extend through the leap and place the landing foot before recovering the stance.

KEY POINT

Absorb impact with bent knees and do not overreach.

Fundamental Body Methods

基本身法

Turning, leaning, level changes, evasions, falls, and aerial body turns.

Side Turn

侧身 · 图 2-54-2-55

1 / 1

FIGURES 2-54-2-55

Follow each row left to right.

A linked turn from front-facing guard to a narrower side profile.

STEP 1

Begin the turn

ACTION

Rotate the shoulders and hips so the body presents a narrower side.

KEY POINT

Let the feet and knees turn with the torso.

2-54

2-55

STEP 2

Return to guard

ACTION

Unwind under control and recover the original guarded alignment.

KEY POINT

Keep the head oriented toward the working direction.

2-55

2-54

Forward Bend

前俯身 · 图 2-56-2-57

1 / 1

FIGURES 2-56-2-57

Follow each row left to right.

A linked forward body evasion from the guarded stance.

STEP 1

Fold forward

ACTION

Incline the torso forward from the hips while the stance remains rooted.

KEY POINT

Keep the neck long and avoid rounding sharply through the lower back.

STEP 2

Recover upright

ACTION

Drive through the legs and hips to return to the guarded posture.

KEY POINT

Rise without throwing the head backward.

Backward Lean

后仰身 · 图 2-58-2-59

1 / 1

FIGURES 2-58-2-59

Follow each row left to right.

A linked backward body evasion with the base maintained.

STEP 1

Lean away

ACTION

Shift the hips and incline the upper body backward while keeping the feet planted.

KEY POINT

Use a small range and support the movement through the legs.

STEP 2

Return to center

ACTION

Bring the torso back over the stance and recover the guard.

KEY POINT

Do not snap the spine or lose sight of the front.

Side Lean

侧倒身 · 图 2-60-2-61

1 / 1

FIGURES 2-60-2-61

Follow each row left to right.

A linked lateral body evasion; it is not a drop to the floor.

STEP 1

Shift sideways

ACTION

Move the hips and incline the torso to one side while maintaining the stance.

KEY POINT

Keep weight supported through the legs rather than hanging on the lower back.

STEP 2

Recover the line

ACTION

Return the torso to center and reform the guard.

KEY POINT

Use equal control on both sides.

Rear Turn

后转身 · 图 2-62-2-64

1 / 1

FIGURES 2-62-2-64

Follow each row left to right.

A linked turn to face behind; the middle posture repeats.

STEP 1

Initiate behind

ACTION

Turn the head and shoulders, then let the hips and feet follow toward the rear.

KEY POINT

Spot the new direction before transferring weight.

STEP 2

Complete the turn

ACTION

Finish the rotation in a balanced guard facing the opposite direction.

KEY POINT

Allow both feet to pivot so neither knee remains twisted.

Crouching Body Shift

下蹲身 · 图 2-65-2-66

1 / 1

FIGURES 2-65-2-66

Follow each row left to right.

A linked level change from the guarded stance.

STEP 1

Sink the body

ACTION

Bend the hips and knees to lower the torso while retaining the guard.

KEY POINT

Keep the heels controlled and the knees aligned.

STEP 2

Rise to stance

ACTION

Press through the feet to return to the original height.

KEY POINT

Rise vertically rather than pitching forward.

Evasive Body Shift

闪身 · 图 2-67-2-68

1 / 1

FIGURES 2-67-2-68

Follow each row left to right.

A quick linked displacement of the body off the original line.

STEP 1

Slip off line

ACTION

Shift the feet and torso together to move the body away from the centerline.

KEY POINT

Keep the movement compact and the guard between the head and front.

STEP 2

Recover position

ACTION

Re-center into a stable stance after the evasive shift.

KEY POINT

Do not overstep or cross the feet.

Aerial Rear Turn

腾空后转身 · 图 2-69-2-72

1 / 1

FIGURES 2-69-2-72

Follow each row left to right.

A linked jumping turn; learn the pivot and landing on the ground first.

STEP 1

Load the jump

ACTION

Turn toward the rear and bend the knees to prepare the takeoff.

KEY POINT

Keep the floor clear and use minimal height while learning.

STEP 2

Jump and rotate

ACTION

Leave the floor, continue the rearward rotation, and prepare the feet to land.

KEY POINT

Land with bent knees and regain the guard before repeating.

Body Flip / Overturn

翻身 · 图 2-73-2-78

1 / 2

FIGURES 2-73-2-78

Follow each row left to right.

The source presents two distinct linked variants: cross-step and open-step overturns.

STEP 1

Cross-step setup

ACTION

Use the crossing step and upper-body arc to begin the first overturning variant.

KEY POINT

Let the support foot turn with the body.

STEP 2

Cross-step finish

ACTION

Continue the arc and settle into the new facing direction.

KEY POINT

Keep the motion controlled through the finish.

Body Flip / Overturn

翻身 · 图 2-73-2-78

2 / 2

FIGURES 2-73-2-78

STEP 3

Open-step setup

ACTION

From the open stance, circle the upper body and arm to begin the second variant.

KEY POINT

Maintain stance width and avoid locking either knee.

STEP 4

Open-step finish

ACTION

Complete the overturn and recover the guarded posture.

KEY POINT

Finish balanced before reversing or repeating.

Side Fall to Ground

侧身倒地 · 图 2-79-2-83

1 / 2

FIGURES 2-79-2-83

Follow each row left to right.

The source presents two side-fall variants. Learn both on mats under qualified supervision.

STEP 1

First variant: lower

ACTION

Shift sideways, bend deeply, and bring the body toward the floor under control.

KEY POINT

Use a padded surface and never collapse onto a locked arm.

STEP 2

First variant: settle

ACTION

Continue onto the side of the body while guiding the descent with the limbs.

KEY POINT

Protect the head and spread contact across a broad surface.

Side Fall to Ground

側身倒地 · 图 2-79-2-83

2 / 2

FIGURES 2-79-2-83

STEP 3

Second variant: set

ACTION

Begin the second source variation from its illustrated guarded stance.

KEY POINT

Confirm clear mat space on the falling side before moving.

STEP 4

Second variant: fall

ACTION

Lower into the alternate side-fall shape and guide the body to the floor.

KEY POINT

Keep the head lifted and avoid catching the descent on a locked hand.

Twisting Level Turn

拧身平转 · 图 2-84-2-87

1 / 1

FIGURES 2-84-2-87

Follow each row left to right.

A linked level turn driven by coordinated foot and torso rotation.

STEP 1

Wind the turn

ACTION

Twist from the stance and carry the torso around a level path.

KEY POINT

Keep the feet able to pivot and the head aware of the new line.

STEP 2

Complete and settle

ACTION

Continue the rotation and finish in a balanced guarded stance.

KEY POINT

Do not let the shoulders outrun the hips and feet.

Probing Body Extension

探身 · 图 2-88-2-89

1 / 1

FIGURES 2-88-2-89

Follow each row left to right.

A linked extension and return from the stance.

STEP 1

Extend to probe

ACTION

Lengthen the torso and reach the body line outward while the base remains anchored.

KEY POINT

Reach from the hips without locking the supporting knee.

STEP 2

Withdraw safely

ACTION

Draw the torso back over the stance and recover the guard.

KEY POINT

Keep the return as controlled as the extension.

Swaying Body

摇身 · 图 2-90-2-92

1 / 1

FIGURES 2-90-2-92

Follow each row left to right.

A linked body sway; the middle posture repeats.

STEP 1

Sway off center

ACTION

Shift the torso and hips along the illustrated curved path.

KEY POINT

Keep the feet grounded and the movement within a comfortable spinal range.

STEP 2

Return through guard

ACTION

Carry the body back through center into the balanced stance.

KEY POINT

Avoid whipping the head or holding the breath.

Aerial Flying Body

腾空飞身 · 图 2-93-2-95

1 / 1

FIGURES 2-93-2-95

Follow each row left to right.

A linked jumping body displacement; practice the landing first.

STEP 1

Load and take off

ACTION

Drive from the stance and lift the body into the illustrated traveling jump.

KEY POINT

Use a short distance and a clear, non-slip landing area.

STEP 2

Shape and land

ACTION

Organize the limbs in the air and place the landing foot under the body.

KEY POINT

Absorb the landing and recover balance before continuing.

Forward Turn

前转身 · 图 2-96-2-97

1 / 1

FIGURES 2-96-2-97

Follow each row left to right.

A linked forward-direction body turn shown in two figures.

STEP 1

Turn forward

ACTION

Step and rotate the body toward the forward line shown in the sequence.

KEY POINT

Turn the feet with the hips and keep the guard organized.

STEP 2

Recover the stance

ACTION

Settle the turn, then return under control before another repetition.

KEY POINT

Finish with both knees aligned and the weight centered.

Aerial Forward Turn

腾空前转身 · 图 2-98-2-100

1 / 1

FIGURES 2-98-2-100

Follow each row left to right.

A linked jumping forward turn; learn the grounded turn and landing first.

STEP 1

Load and rotate

ACTION

Turn forward from the stance and use the legs to initiate the jump.

KEY POINT

Keep the rotation compact and the landing area visible.

STEP 2

Land the turn

ACTION

Complete the rotation in the air and place the feet into a controlled landing stance.

KEY POINT

Bend the knees on contact and regain the guard before repeating.
