1 / 2

FIGURES 1-40-1-44

Follow each row left to right.

A linked jumping sequence. Learn the path at ground level first.

STEP 1

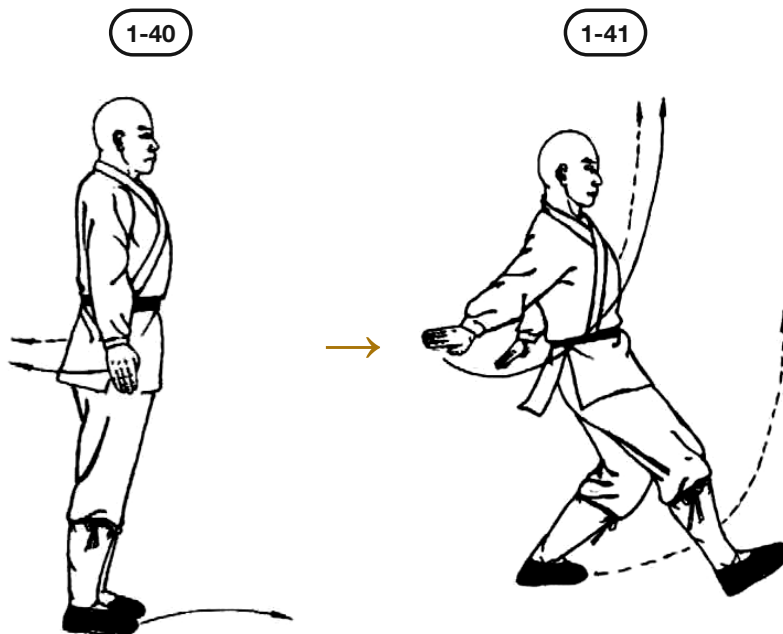

Step and load

ACTION

Step forward on the right foot, soften the knee, incline the upper body slightly back, and swing both arms behind.

KEY POINT

Use a clear, stable takeoff stance before adding height.

STEP 2

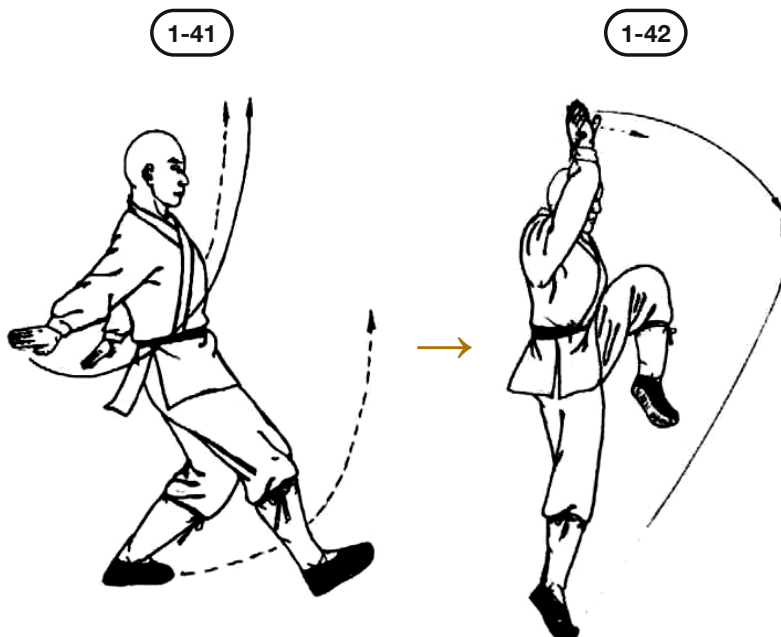

Jump and swing

ACTION

Push from the right foot, swing the left knee upward, and carry both arms overhead as the body rises.

KEY POINT

Coordinate the arm swing and knee lift; do not force the jump.

FIGURES 1-40-1-44

STEP 3

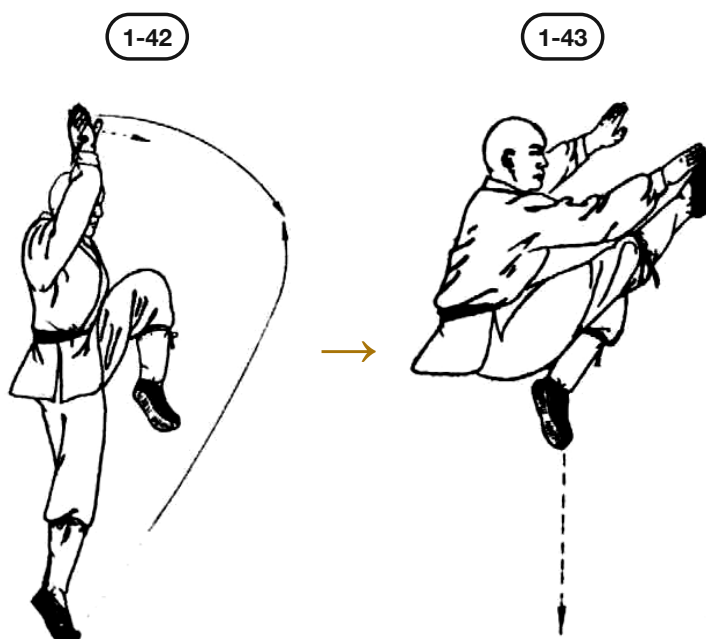

Kick in the air

ACTION

Extend the right leg forward and upward while the left knee stays lifted. Meet the right foot with the right hand.

KEY POINT

Use a comfortable kick height and keep the landing in view.

STEP 4

Land in sequence

ACTION

Lower the legs and land left then right, absorbing the impact through bent knees.

KEY POINT

Practice on a clear, non-slip surface and stop if the landing becomes heavy.
