Follow each row left to right.

A linked turning jump. Learn the turn, jump, and landing separately first.

STEP 1

Step into the turn

ACTION

Step the left foot forward and turn the body right as the arms open into the illustrated preparation.

KEY POINT

Keep the head level and the floor clear before rotating.

STEP 2

Plant and coil

ACTION

Continue turning left-front, step the right foot, bend the knee, and coil the arms for takeoff.

KEY POINT

Place the right foot securely; avoid twisting on a fixed knee.

STEP 3

Jump and rotate

ACTION

Push from the right foot, swing the left knee back and upward, and rotate the torso left as the arms circle.

KEY POINT

Build the rotation from the step and arm path rather than forcing the neck.

STEP 4

Sweep and strike

ACTION

In the air, sweep the right leg inward and upward while the left palm meets the sole.

KEY POINT

Use a lower target until the body can remain organized in the air.

STEP 5

Land under control

ACTION

Complete the turn and land on the forefeet in sequence or together, as the source permits.

KEY POINT

Absorb the landing through bent knees and regain balance before moving on.

STEP 6

Reset before repeating

ACTION

Return to the upright starting stance and set the feet before another repetition.

KEY POINT

Do not chain repetitions after a loose or noisy landing.
