

# Shoulder-Release & Joint-Opening Tu-Na

伸筋活络吐纳法

1 / 3

FIGURES 14-15

Follow each panel left to right.

inhale

exhale

voiced  
release

One continuous inhale builds through figures 1-14 to 1-17; the release is figure 1-18.

## Set up

breathe naturally

Stand upright with the feet about shoulder-width, arms at the sides, and the whole body relaxed.

14

14

15

## Inhale

begin a smooth, unbroken intake

Lift both hands forward to shoulder height, arms extended, **palms down** and **fingertips forward**.

The final breath may leave through the nose or mouth and may be voiced. Keep the knee sink controlled.

FIGURES 15–17

## Continue

the same inhale

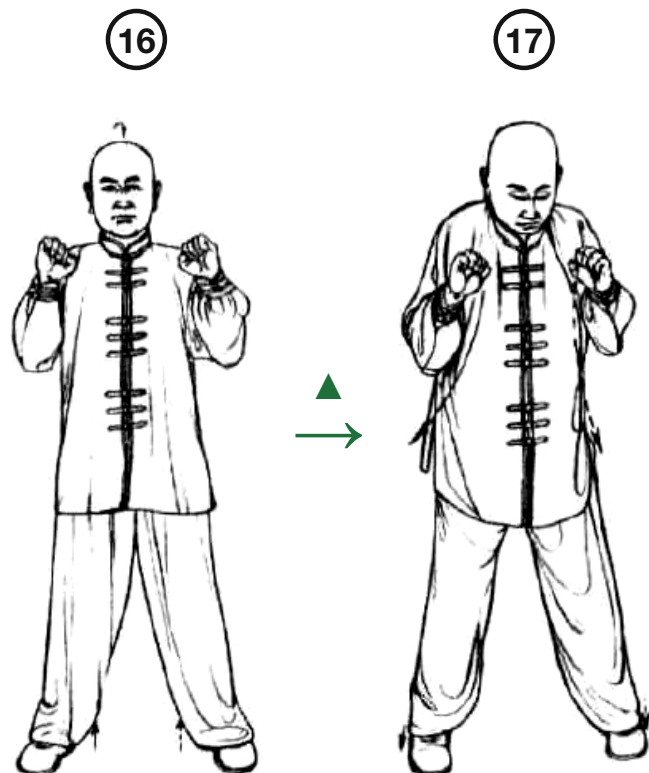

Make fists and bend the elbows, drawing the fists before the shoulders—**fist hearts forward, knuckles up**.

## Fill

complete the inhale

Incline the head and upper body forward and lift both heels.

The final breath may leave through the nose or mouth and may be voiced. Keep the knee sink controlled.

FIGURES 17-18

## Release

brisk · nose or mouth

Open the fists and press the palms down beside the hips. Straighten the upper body while bending the knees and sinking. A voiced exhale is allowed.

The final breath may leave through the nose or mouth and may be voiced. Keep the knee sink controlled.
