release

A compact two-position exercise. Repeat only while the breath and posture remain comfortable.

19

Inhale

deep • fill completely

Stand with both hands embracing the lower abdomen. Inhale fully through the nose.

19

20

Sound & exhale

forceful • through the mouth

Drive both palms straight forward at shoulder height while intentionally rounding the upper back.

Voice the release and empty the breath.

The source calls for a forceful mouth exhale with sound; stop if you feel light-headed or strained.
